SUMMARY

Software Developer with 1.8 years of experience specializing in front-end and back-end development. Proficient in HTML, CSS, JavaScript, Angular, Cypress, SQL, Node.js, Git, Postman, Jira, MongoDB, TypeScript, GitHub, and Agile methodologies. Adept at creating and implementing innovative software solutions to drive business growth and enhance user experiences.

EDUCATION

Bachelors of Engineering in Computer Science -2021

RTMNU , Nagpur University

SKILLS

- Front-end Development: HTML, CSS, JavaScript, Angular
- Back-end Development: Node.js, MongoDB, SQL .
- Tools: Git, Postman, Jira. Version
- Control: GitHub
- Programming Languages TypeScript
- Methodologies: Agile

HOBBIES

- Gardening
- One To Be Build New Things

PROFESSIONAL EXPERIENCE

INFOTEL INDIA PVT LTD, BENGLORE, INDIA |2021-Till Date|

PROJECT:- worked on web based customer Management software (CRM) For Hotel Management.

- Collaborated with cross-functional teams to gather requirements and design responsive and user-friendly web applications using Angular and TypeScript with Material Design and Bootstrap.
- Developed and maintained client-side interfaces utilizing HTML, CSS, and JavaScript to ensure a seamless user experience.
- Utilized Angular framework to build responsive and interactive front-end components, increasing overall application performance.
- Implemented end-to-end tests with Cypress, reducing the number of bugs and improving the overall software quality. Employed Agile methodologies to participate in sprint planning, daily stand-ups, and retrospectives for efficient project management.
- Utilized Git and GitHub for version control and collaboratedwith team members to efficiently manage codebase and resolve merge conflicts.
- Integrated Node.js backend solutions, creating scalable and robust server-side functionalities.
- Employed Postman for API testing and validation, streamlining the development process and improving API functionality Managed and tracked project progress, tasks, and issues using Jira, ensuring effective communication and timely delivery of milestones.
- Leveraged SQL and MongoDB for database management, ensuring data integrity and efficient retrieval for applications.
